THE FACULTY

1945-1946

JOHN ADRIANI, A.B., M.D.,

Assistant Professor of General Anesthesia

SLATTERY C. ALEMAN, D.D.S.,

*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

CHRISTIAN A. ALLENBURGER, JR., D.D.S., *

Instructor in Orthodontics

JOHN G. ARNOLD, JR., Ph.D.

Consultant in Biological Sciences

*On leave for military service.

PAUL F. BAILEY, B.S., M.S.,
Associate Professor of Physiological Chemistry

REV. JOSEPH B. BASSICH, S.J., Ph.D.,
Regent, Professor of Religion

VERNON S. BODDICKER, D.D.S.,
Assistant Professor of Prosthetic Dentistry

PHILIP A. BOUDREAUX, M.D.,
Instructor in Anatomy

JOSEPH M. BOWAB, A.B., LL.B.,
Lecturer in Dental Jurisprudence

MARION E. BRIERRE, D.D.S.,*
*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

A. CLAUDE BROUSSARD, D.D.S., F.A.C.D.,
Professor of Dental Histology

HARRY J. CLAUSEN, B.A., M.S., Ph.D.,
Professor of Anatomy

THOMAS E. CLEMENTS, M.D., F.A.C.S.,
Professor of Anatomy

PAUL COOK, A.B., D.D.S., M.P.H.,
*Chief, Section of Dental Health, La. State Dept. of Health,
Lecturer in Public Health Dentistry*

MARIE COPPING,
Infirmary Attendant

CLYDE E. CRASSONS, D.D.S.,
Instructor in Dentistry for Children

PETER B. DREZ, D.D.S.,
Assistant Professor of Oral Surgery

FRANCIS B. DUCASSE, D.D.S.,*
*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

ROBERT F. EASTMAN, D.D.S.,
Professor of Operative Dentistry

*On leave for military service.

EDWARD R. FERRO, D.D.S.,
Resident Instructor in Oral Surgery,
Louisiana State Charity Hospital

ALTON K. FISHER, D.D.S.,
Assistant Professor of Pathology

EUGENE L. FORTIER, D.D.S.,
Special Lecturer in Periodontia

VAL H. FUCHS, M.D., F.A.C.S.,
Lecturer in Special Osteology

EDWARD A. GAMARD, D.D.S., F.A.C.D.,
Professor Emeritus of Operative Dentistry

ROBERT W. GASTON, D.D.S.,**
Special Lecturer in Orthodontics

F. J. GENRE, D.D.S., F.A.C.D.,
Professor of Dental Anatomy

W. ORMOND GOGGIN, D.D.S.,
Associate Professor of Dental Pathology

CORNELIUS E. GORMAN, A.B., M.A., M.D.,*
Professor of Pathology

NORMAN F. GUENO, D.D.S.,
Associate Professor of Partial Denture Prosthesis

THOMAS L. HAGAN, D.D.S., M.P.H.,
Senior Dental Surgeon, U. S. Public Health Service
Lecturer in Public Health Dentistry

EDWARD J. IRELAND, Ph.D.,
Professor of Materia Medica

MARION F. JARRELL, D.D.S., F.A.C.D.,
Special Lecturer in Oral Hygiene

MARY GERBINE JUNKER, R.N.,
Assistant in Oral Surgery

CHARLES P. KELLEHER, D.D.S.,
Professor of Oral Surgery

*On leave for military service.

**Deceased May 24, 1945.

MORRIS H. LAUFER, D.D.S.,*

*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

WALTER LEABO, D.D.S., F.A.C.D.,

Special Lecturer in Periodontia

ANTHONY N. LEVATA, D.D.S.,*

Instructor in Roentgenology and Diagnosis

DUANE W. LOVETT, D.D.S.,

Assistant Professor of Roentgenology and Diagnosis

ALDEA MAHER, A.B., A.M., M.D.,

Special Lecturer in Physiological Chemistry

VICTOR B. MARQUER, D.D.S.,*

*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

EDMOND L. MERILH, B.S., M. S.,

Professor of Bacteriology

M. ELIZABETH MIDDLETON, A.B., B.S. in L.S.,

Librarian

WALTER G. MOORE, Ph.D.,

Assistant Professor of Physiology

JAMES T. NIX, B.S., A.M., M.D., LL.D., F.A.C.S.,**

Professor of Principles of Surgery and General Anesthesia

JAMES T. NIX, JR., B.S., M.D.,*

Instructor in Principles of Surgery

REGINA A. NOEL, R.T.,

Technician

LAURIE E. OHLMEYER,

Registrar

MARY CLAIRE OHLMEYER,

Record and Receiving Clerk

CRESCENCIO G. OLIVEIRA, B.A., D.D.S.

Instructor in Prosthetic Dentistry

*On leave for military service.

**Deceased May 17, 1945.

DONALD L. PETERSON, D.D.S.,
*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

HAROLD W. PETERSON, D.D.S., M.S.D.,
Assistant Professor of Operative Dentistry

JACK P. POLLOCK, D.D.S.,
Instructor in Operative Dentistry

JOSEPH E. PSAYLA, A. M., D.D.S., F.A.C.D.,
Professor of Prosthetic Dentistry

ROBERT A. ROBINSON, B.S., M.D.,
Professor of Physical Diagnosis and Principles of Medicine

JOHN P. SCHIRO, D.D.S.,*
*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

RALPH E. SHERWOOD, D.D.S.,
Professor of Partial Denture Prosthesis

ALBERT D. SMITH, JR., Ph.G., D.D.S.,
*Visiting Instructor in Oral Surgery and Exodontia,
Louisiana State Charity Hospital*

PRESCOTT E. SMITH, D.D.S., F.A.C.D.,
Assistant Professor of Orthodontics

THOMAS D. SPEIDEL, M.S., D.D.S.,
Dean, Professor of Dentistry

MAXINE M. STIEGLER,
Office Assistant

SIDNEY L. TIBLIER, A.B., M.S., D.D.S., F.A.C.D.,
Professor of Pathology

LELAND E. WEYER, D.D.S.,
Lecturer in Prosthetic Dentistry

H. EUGENE WOODWARD, D.D.S.,*
Lecturer in Practice Management and Orientation

*On leave for military service.

THE SCHOOL AND ITS FACILITIES

Organization In the spring of 1914 the Board of Directors of Loyola University invited Dr. C. V. Vignes to begin the organization of a faculty for a School of Dentistry. Dr Vignes became the first dean of the new school which enrolled its first students in September, 1914. The School of Dentistry is an integral part of the University, organized under its general Charter and governed by its Board of Directors.

The School is a member of the American Association of Dental Schools, and complies with the recommendations of this Association.

Objectives At all times and in all activities the School seeks to maintain the highest possible standards.

The educational program directs and assists the student in fitting himself for the general practice of his profession in all the biological, technical and social aspects of oral health service, and encourages him in developing habits of study and inquiry. Solid content in courses, strict standards of scholarship, and sound methods of teaching guide the student in his acquisition of initiative and self-reliance in extending his knowledge and developing his skill.

Location The University is situated in one of the best residential sections of New Orleans, at 6363 St. Charles Avenue, opposite Audubon Park. The School of Dentistry, occupying Bobet Hall, is located on the campus.

Student Housing The University maintains a limited number of rooming houses for the convenience of male students wishing to use these facilities. Students may board and lodge only at rooming houses approved by the University authorities. Names and locations of such inspected and approved houses will be furnished by the Registrar.

Equipment The School is well equipped. Particular care has been taken to make the laboratories and clinics adequate and modern. The technical laboratories are large, bright and airy. Each student has an individual laboratory desk with gas, compressed air, and electrical connections. Furnaces, dental engines, polishing motors, casting machines, and electrical ovens are available. All other laboratories are well planned and equipped.

The Infirmary, well lighted and ventilated, is equipped throughout with standard operative units and chairs and

sterilizers. The number of patients and variety of work amply ensure each student sufficient experience to make him proficient in clinical work before graduation.

Hospital Facilities Exceptional facilities for acquiring actual experience in hospital practice and methods are available and are utilized by the students of dentistry.

In the Louisiana State Charity Hospital, students observe hospital practice in diagnosis, wardrounds, anesthesia, and surgery. The morning outpatient dental surgery clinic is staffed by students under the supervision of their teachers.

Members of the senior class attend clinics in surgery at the Louisiana State Charity Hospital and the Hotel Dieu under some of the foremost surgeons in the South. They are instructed in making diagnoses and witness the subsequent operations. They observe the administration of various forms of anesthetics and learn the importance of aseptic precautions.

Library Students of the Dental School have the following library facilities: The general University Library in Marquette Hall; The Medical-Dental Library on the second floor of Bobet Hall; and smaller libraries in Chemistry, Pharmacy, and the Biological Sciences, each in its own department in Bobet Hall.

A museum in connection with the Dental Library has been started. Further donations to it are solicited.

"Dentalia" This is a journal of Dentistry, sponsored by the faculty, alumni and student-body and published by the school. Its purpose is to afford the student an opportunity to begin the practice of writing on dental topics. Publication is suspended at present.

Loans A loan fund for students who would otherwise be unable to continue their dental education is available to Sophomore, Junior and Senior students.

Organizations Students in the School of Dentistry are eligible to membership in various scholastic, religious, cultural, and athletic organizations of the University including the several dental societies and fraternities.

The C. Victor Vignes Odontological Society This is an undergraduate honor society open to Seniors and Juniors and named for the late Dean Emeritus C. V. Vignes, the first dean of the School, distinguished for his service to organized dentistry and dental education. Scholarship above the average and ambition to excel are required for membership, to which a student is elected by the members of the Society with the approval of the Dean. Its purpose is "to further the interest and knowledge of its members in the science of dentistry." Scientific papers, table clinics and demonstrations by the members of the Society, by the Faculty, Alumni, and other guests form the programs of the meetings.

Junior A. D. A. To stimulate the students to appreciate and to participate in the activities of organized dentistry, and to fit them in some degree to do so, Sophomores, Juniors, and Seniors are required to hold Junior membership in the American Dental Association and to take active part in its work.

Dental Fraternities Further to inspire the student with high professional ideals both during his school days and in after life, chapters of the various national dental fraternities are maintained. There is the Delta Omega Chapter of the Psi Omega; the Alpha Chi Chapter of Xi Psi Phi; the Zeta Zeta Chapter of Delta Sigma Delta; and the Alpha Theta Chapter of Alpha Omega.

Omicron Kappa Upsilon This is a national honor fraternity for graduates. Seniors are elected to it by the faculty members of the Society. Not more than twelve per cent of a graduating class may be elected, and then only on a basis of superior scholarship, character, and conduct. Presentation of the key takes place at the last convocation of the year.

The Alumni Association This organization, having for its purpose to keep alive within its members the spirit of study and to assist the School, holds quarterly meetings, one of which is the annual reunion, and fosters the development of "*Dentalia*."

ADMISSION AND REGISTRATION

The Pre-Dental Course

The minimum basis for admission to the School of Dentistry is the successful completion of two full academic years of work in an accredited college of liberal arts and sciences. The pre-dental course must include at least a year's credit in English, in biology, in physics, and in inorganic chemistry, and a half year's credit in organic chemistry. All courses in science should include both class and laboratory instruction. Formal credit in biology and physics, but not in English and chemistry, may be waived in the case of exceptional students who have three years of college credit or in the case of those holding a bachelor's or other degree from an accredited college.

The pre-dental course is offered at Loyola in the College of Arts and Sciences.

No applicant will be considered for admission to the Loyola University School of Dentistry unless the official record of all his pre-dental college work indicates a general average of C or better.

Combined B.S. and D.D.S. Degrees Owing to the advance in college preparation required for admission to the dental course, it now becomes feasible for the candidate for a D.D.S. degree to receive also a B.S. degree without much additional time being spent in the College of Arts and Sciences.

Accordingly, it is strongly recommended that students preparing to enter the School of Dentistry discuss this matter with their Deans, and ascertain the precise requirements in their colleges. In many instances it will be found that by attending summer courses, in addition to the pre-dental course of two years, they will be eligible to receive a B.S. degree prior to their receiving the D.D.S. degree. In the case of those students who have made three years of the course leading to the B.S. degree, there should ordinarily be no difficulty about receiving this degree during their dental course.

Application for Admission

Applicants for admission to the School of Dentistry are advised to make their applications early and in writing. Application forms for this purpose may be secured from the Office of the Registrar, Loyola University School of Dentistry, and the completed form

accompanied by a photograph should be returned to the same address. Applicants must request the Registrar of each college or university which they have attended to send directly to the Registrar of Loyola University School of Dentistry an official transcript of all of their college work. Interviews of the applicant by the Committee on Admissions are usually arranged.

Admission Of Women The Dental School is open to women who have the proper credentials.

Advanced Standing A student desiring to transfer to this school from another recognized dental school must present the following documents: (1) transcripts of all college work showing (a) pre-dental work at least equal to that which had been required of the class which he wishes to enter, (b) work in a school of dentistry comparable in scope to the curriculum of this school, and of a quality which indicates eligibility to proceed with the study of dentistry in this school; (2) a letter from the Dean of the school which he has attended; (3) a statement of reasons for desiring to transfer; (4) an application form with a recent photograph.

The decision as to whether an applicant possesses the qualifications required in a student of Loyola University School of Dentistry rests entirely with the Committee on Admissions.

Registration First semester registration will take place on the Wednesday, Thursday, and Friday preceding the date of opening of classes. Freshman students are urged to register early in this period. Second semester registration will take place on the first Monday and Tuesday of the second semester. The procedure is:

1. Fill out the registration cards which are obtained in the Registrar's office in the School of Dentistry.

2. Report to the Bursar's office with one copy of the registration card, pay tuition and fees and obtain an Admit Card.

3. Return the Admit Card to the Registrar of the School of Dentistry and obtain a list of books and instruments, locker and laboratory desk assignments, and a schedule of classes.

Students must complete their registration and obtain the required equipment and books prior to the opening of classes.

STUDENT EXPENSES

Basis of Computation The student expenses fall into the general classes of tuition, fees, books, and instruments. The following statements explain these costs.

Matriculation

Payable on first admission to the University.....\$ 5.00

Registration

Payable at the beginning of each scholastic year..... 5.00

Tuition

Payable on registration for each semester..... 150.00

Laboratories

Payable for each laboratory course on registration
each semester 4.00

Student Activities

Payable on registration each semester..... 5.00

Athletics

Payable on registration each semester..... 5.00

Lockers

Payable on registration each semester..... 1.00

Library

Payable on registration each semester..... 5.00

Clinic

Payable on registration each semester of junior and
senior year 10.00

Manuals and Examination Books

Payable at the beginning of each scholastic year..... 1.25

Graduation Fee

Payable during 2nd semester of senior year..... 15.00

Microscope Rental

Payable on registration each semester, freshman
and sophomore year..... 5.00

Students are required to purchase essential books and instruments.

Table of Expenses The following table shows the approximate costs of each semester of the dental course.

FRESHMAN YEAR		1st Sem.	2nd Sem.
Tuition		\$150.00	\$150.00
Fees		52.25	41.00
Books		50.50	14.50
Instruments (approximately).....		200.00	
Total (approximately).....		\$452.75	\$205.50
SOPHOMORE YEAR			
Tuition		\$150.00	\$150.00
Fees		47.25	41.00
Books		42.50	15.50
Instruments (approximately).....		320.00	
Total (approximately).....		\$559.75	\$206.50
JUNIOR YEAR			
Tuition		\$150.00	\$150.00
Fees		36.25	30.00
Books		20.75	
Instruments (approximately).....		100.00	
Total (approximately).....		\$307.00	\$180.00
SENIOR YEAR			
Tuition		\$150.00	\$150.00
Fees		32.25	41.00
Books		32.00	
Total (approximately).....		\$214.25	\$191.00

Withdrawals and Refunds In no case will the matriculation and registration fees or any part of them be refunded. Cash refunds of tuition and other fees will be made as follows for students who withdraw:

Within the first two days.....	100%
Two days to one week.....	90%
One week to two weeks.....	80%
Two weeks to three weeks.....	70%
Three weeks to four weeks.....	60%
Four weeks to five weeks.....	50%
Five weeks to six weeks.....	40%

PROMOTION AND GRADUATION

Attendance The school year includes two semesters of sixteen weeks each. There are brief recesses at Christmas and Easter as indicated in the school calendar.

Daily attendance records are kept of all students from the opening of school. Regular and punctual attendance at all classes and laboratory exercises is insisted upon. Unexcused absences will be deemed sufficient reason for dismissal, or for the withholding of credits for the year's work.

To be eligible for examination in a subject a student is required to have a minimum attendance record of 85 per cent in that subject.

An excuse for absence does not relieve the student of responsibility for making up the classwork omitted. This must be made up by the student to the satisfaction of the Professor or Instructor. The responsibility of meeting the deficiency rests upon the student.

Tardiness of *less* than ten minutes at a classroom exercise will count as one-half of an absence. Tardiness of *more* than ten minutes will be counted as an absence.

In the case of absence due to illness, the student must inform the office by mail or otherwise on the *first* day of absence.

A double absence will be recorded for absence on days immediately preceding or following scheduled holidays.

Examinations Quizzes, written and oral, are held frequently during each semester. Satisfactory grades in these quizzes are a prerequisite for admission to semester examinations and to continuance in the course. Practical examinations in laboratory and clinical work are held in the middle and at the end of each semester. Written examinations are held at the end of each semester; and in courses running through two semesters the written examinations will cover the entire subject. Regardless of the average of the quizzes, the semester examination grade must always be a passing grade. There is no averaging of laboratory and clinical grades; this work must be satisfactory throughout in each particular phase.

There is a charge of \$1.00 for a quiz or examination taken out of regular time.

In the senior year, general examinations are held in each subject of the whole field of dental study. A passing grade in each subject, with a general average above 80 per cent, is required for graduation. Prizes are awarded for the two best averages in these comprehensive examinations, provided that, in the opinion of the Faculty, these averages deserve special distinction.

Grades The passing grade in a subject is 75 per cent; a grade between 60 per cent and 75 per cent is defined as a condition; and a grade below 60 per cent, a failure.

A student receiving a failing grade must repeat the course. A student receiving a condition grade must take a re-examination on the date set in the school calendar. If not successful in this re-examination, he receives a failing grade and must repeat the course.

No grade higher than 75 per cent will be given for any examination or quiz taken out of the regular time for any reason.

If a student receives more than three conditions in the first semester examinations, he must withdraw from the School, but, at the discretion of the Committee on Admissions he may be readmitted the following year for a repetition of that semester in every subject. If more than three conditions are incurred at the end of the second semester, at the discretion of the Committee on Admissions he may be readmitted at the beginning of the next scholastic year, but he must repeat the entire year in every subject. In computing the number of conditions, one failure will count as two conditions.

Promotion In general, a mere passing grade in each subject is not sufficient for promotion or graduation; there must be definite quality in the student's work. Accordingly, it is required that he maintain an average of at least 81. A student will not be promoted while any condition or any failure or any incomplete course is charged against him. When required to repeat a year, the student must repeat all subjects and maintain an average of 85 in his work. No student will be allowed to repeat more than one year of the course, or to repeat a class more than once.

Discipline The educational system of the University stresses the development of Christian character and gentlemanly behavior at all times and in all places.

The School reserves the right to terminate its connection with any student who does not give sufficient promise of attaining that degree of scholarship and technique required in a Doctor of Dental Surgery, or who lacks those qualities which enter into the fine character required in a worthy member of the dental profession, or whose conduct in or out of the School is objectionable. The final decision in this matter rests with the Advisory Board of the School. The fees of such a student will not be returned.

The School is not responsible for the loss of any personal property belonging to any of its students, whether the loss occurs by theft, fire, or an unknown cause.

Requirements On recommendation of the Advisory Board, **For Graduation** the degree of Doctor of Dental Surgery (D.D.S.) will be conferred on those candidates who have complied with the following requirements: (1) The candidate must have given evidence of good moral character and ethical ideals; (2) he must have completed with due quality all courses and examinations prescribed; (3) he must have paid all indebtedness to the School; and (4) he must be at least twenty-one years of age.

Graduation In accordance with the general policy of the **Honors** University to honor those students who complete their courses with distinction, the degree of Doctor of Dental Surgery *cum laude* and *magna cum laude* is conferred upon those candidates whose grade average for the full course in this School is 90 and 95 respectively.

DESCRIPTION OF COURSES

OPERATIVE DENTISTRY

Dr. Eastman Dr. Peterson Dr. Pollock

Course I A lecture and laboratory course in the fundamental principles and technic of this subject. It is given in sophomore year.

Course II A lecture course throughout junior year dealing with the clinical phases of the subject.

Course III Practical instruction to seniors on the management of patients in the chair, and the most approved methods of performing operative work in actual practice.

DENTAL ANATOMY

Dr. Genre Dr. Pollock

A lecture and laboratory course covering in detail the structure, development, characteristics, arrangement, and function of all teeth in the oral cavity, with systematic nomenclature. A careful study is made of the surfaces, ridges, fossae, pulp chambers and pulp canals of the teeth, proper contact of approximate teeth, normal occlusion and the relation of the teeth to their supporting tissues.

PROSTHETIC DENTISTRY

Dr. Psayla Dr. Sherwood Dr. Gueno
Dr. Weyer Dr. Boddicker Dr. Oliveira

Complete Denture Prosthesis **Course I** A lecture and laboratory course in the principles and technic of full denture construction. It is given in the freshman year.

Course II This course in sophomore year covers the various accepted methods of practical impression-taking which are explained and demonstrated in the clinic. Students are given practice in constructing the many approved types of artificial restorations, stressing the anatomical outlines of the arch and the importance of occlusion.

Course III Lectures in this course in senior year cover the physiological, anatomical, and operative phases which influ-

ence full practical denture construction of every type. Original cases are also cited and the special technics involved are explained in detail. Instructions on esthetics are given to students for a better understanding of the construction of full dentures that will harmonize with the facial cosmetics of the individual case.

Partial Denture Course I A lecture and laboratory course in the principles and technic of all forms of partial denture prosthesis. It is given in sophomore year.

Course II A course of lectures and demonstrations throughout the junior year, dealing with the practical principles involved in the construction, application and maintenance of various types of partial dentures.

DENTAL MATERIALS

Dr. Peterson

A course in the chemical and physical properties of the materials used in dentistry and in the fundamental processes of their use.

CLINICAL DENTISTRY

Dr. Speidel	Dr. Goggin	Dr. Smith	Dr. Gueno	Dr. Drez
Dr. Eastman	Dr. Peterson	Dr. Crassons		
Dr. Pollock	Dr. Lovett	Dr. Adriani		
Dr. Boddicker	Dr. Oliveira			

The principles of operative and prosthetic dentistry are applied by the students in their junior and senior years in the dental clinic under the direct supervision of the instructors. Each student has opportunity to utilize his knowledge and skill acquired in operative and prosthetic technics in making actual restorations for the patients.

Special clinic practice in orthodontics is given under the direction of the instructors in clinics conducted on Thursday afternoons and Saturday mornings.

Special opportunities in oral surgery are offered in the surgery clinic of the University, where students perform the minor dental surgical operations under the direct supervision of the instructors. Besides, they regularly attend the outpatient clinic of the Charity Hospital, where they assist the dental surgeons of the University staff.

Summer Clinic and hospital service continue throughout the year except for the month of August, thereby affording members of the junior and senior classes an opportunity to secure additional clinical experience in all departments.

ORTHODONTICS

Dr. Smith

Course I In sophomore year the preclinical course is given dealing in class and laboratory with occlusion and malocclusion, the taking of impressions and making of casts, pouring and correct trimming of models, constructing molar and incisor bands with various forms of soldered attachments, constructing a lingual arch with auxiliary springs, and a labial appliance with bracket bands, in addition to various freehand soldering operations.

Course II This course is given in junior year and consists chiefly in a study of the conditions and factors to be examined in the patient, the indications and contraindications for orthodontic treatment, the planning and handling of the treatment. The principles thus taught are applied in clinic practice, each student under close supervision carrying out the treatment of at least two cases.

Course III The studies of the previous course are carried forward in senior year to include such topics as the relation of tissue and organs under treatment, preventive orthodontic service and the like. The importance of realizing one's limitations in the matter of difficult cases is emphasized. Cases under treatment in the clinic are discussed.

PATHOLOGY

Dr. Tiblier

Dr. Goggin

Dr. Fisher

General Pathology A lecture and laboratory course, in the sophomore year, dealing principally with the pathohistology of the tissues, the predisposing causes of disease, and with the different types of degeneration and infiltration. In the second semester a careful study is made of the benign and malignant tumors, and the diseases common to all systems of organs are outlined, with special attention devoted to diseases of the blood and of the vascular and nervous systems.

Dental Pathology The subject is divided into two courses and is taught in the junior and senior years.

Course I In the junior year, first semester, the phases of the subject studied are diseases of the pulp, root-canal therapy, and caries from a pathological viewpoint. In the second semester, oral hygiene and diseases of the pericementum and other supporting structures of the teeth are considered. Throughout the year, classroom and clinical instruction are carefully co-ordinated.

Course II In the senior year, non-surgical diseases of the jaws and soft structures of the mouth are considered, the symptoms for correct diagnosis are carefully noted and plans of treatment discussed. Practical cases for diagnosis and treatment planning are had in the School Infirmary and opportunity to observe the more serious diseases and their treatment is afforded the student during his term of hospital service.

PERIODONTIA

Dr. Goggin

The etiology, underlying histopathology, and treatment of periodontal diseases are considered and correlated with the special clinical instruction in periodontia.

ROENTGENOLOGY

Dr. Lovett

A lecture and laboratory course in the theory and practice of this subject. Each student is required to make and develop a number of radiographs of the entire mouth. The reading and interpreting of radiographs and the diagnosis of mouth conditions are stressed both in the laboratory and clinic work.

SURGERY

Dr. Kelleher

Dr. Drez

Dr. Ferro

Principles of Surgery The object of this course in the senior year is to give the student a practical knowledge of the application of surgical principles in order that he may be better fitted to co-operate with the surgeon in consultation and more fully comprehend the complications which may arise in his practice.

Oral Surgery In this course lectures are given in the senior year covering the surgical diseases of the jaws and soft tissues of the mouth with some explanation of operative procedure. Supplementing the lectures, the students regularly observe operations as they are performed by their teachers in the dental operating rooms of the Charity Hospital.

Exodontia This course consists of sixteen lectures on the principles of extracting teeth; namely, the proper selection and use of forceps, elevators and instruments that aid in the extraction of teeth. Practical cases are handled by the instructor during the course.

In the outpatient clinic of the Hospital, students extract teeth and do minor oral surgery under the guidance of their instructors. In the special exodontia clinic at the School students are carefully trained.

Local Anesthesia This course consists of sixteen lectures in nerve blocking and infiltration anesthesia. Practical cases are handled by the instructor during the course. Practical instruction is given in the selection and use of syringes, needles, asepsis in the preparation of solutions, etc.

GENERAL ANESTHESIA

Dr. Adriani and Staff

A lecture and demonstration course in the principles and technics of general anesthesia, emphasizing the use of nitrous-oxide-oxygen and other anesthetics in dental operations.

DENTISTRY FOR CHILDREN

Dr. Crassons

A course of lectures throughout the junior year dealing with the growth and development of the child in general and of the deciduous and young permanent dentition in particular; with nutrition, oral hygiene, and other preventive measures. In the clinic, instruction is given in such modifications of the usual operative procedure as are found to be more suitable for the child patient.

PUBLIC HEALTH DENTISTRY

Dr. Cook

Dr. Hagan

This course deals with the newer concepts of dental research, with special emphasis placed on a critical evaluation of the written material that appears in the dental journals and

other popular magazines, and the effect of this material upon the oral health of the public. Some time is devoted to reviewing the coordinated activities of dental health and general health in the United States Public Health Service and in State Health Departments.

ANATOMY

Dr. Clements

Dr. Clausen

Dr. Boudreaux

Gross The course consists of dissection supplemented by **Anatomy** quizzes, conferences and lectures. The aim of this course is to give the student an opportunity to gain a comprehensive knowledge of the structure of the entire body, with special emphasis on the anatomy of the head and neck region. The student is required to make a satisfactory dissection of one lateral half of the body.

MICROSCOPIC ANATOMY

Dr. Broussard

Dr. Clausen

General This course embraces the combined study of **Micro-Anatomy** general embryology, histology, histogenesis and organogenesis. Lectures, recitations, laboratory exercises and special demonstrations illustrating histogenesis, organogenesis, as well as the study of normal adult tissues, will be included.

Dental The tissues of the teeth and oral cavity are studied **Histology** with greater minuteness, charts and models are made use of, and special slides are prepared for microscopical study and projection.

BACTERIOLOGY

Mr. Merilh

General The course comprises the study of the morpho-
Bacteriology logical and biological characteristics of the pathogenic and non-pathogenic bacteria, with particular stress laid on the bacterial flora of the mouth, such as the Streptococci, Spirillum Vincenti and Bacillus Fusiformis of Vincent's infection, and the organisms associated with all forms of parodontosis.

The course is designed to give to the student a working knowledge of the subject and to impress upon him the relation of mouth conditions to systemic disease.

PHYSIOLOGY

Dr. Moore

A lecture and laboratory course, given in sophomore year. The lectures cover the whole field of general physiology, the functions, composition, and operations of the body structures. In the laboratory small mammals are used to demonstrate the physiological processes of respiration, circulation, and digestion.

PHARMACOLOGY

Dr. Ireland

Dr. Moore

Course I A lecture and laboratory course in sophomore year dealing with the action of drugs on the animal system. Care is taken to teach and exemplify the action of those drugs which are chiefly used in the practice of dentistry.

Course II A lecture course, given in junior year, on the classification, description, and properties of drugs and medicines with which a dentist may have to deal. Special stress is laid upon the more important drugs used in dentistry, with a full discussion of their physiological effects and a study of the proper methods of administration. Prescription writing is explained in detail.

PHYSIOLOGICAL CHEMISTRY

Mr. Bailey

A lecture and laboratory course, in freshman year, dealing with the chemical activity of the human body; the significance of osmotic pressure, colloids, hydrogen-ion concentration, buffer action, and oxidation-reduction in physiological processes; the chemistry of fats, carbohydrates, and proteins and their fate in the human body; enzymatic reactions; the blood and other body fluids; hormones; nutrition; animal calorimetry; the vitamins; bone and teeth.

NUTRITION

A lecture course, in junior year, emphasizing the principles of this subject, with particular reference to the problems encountered by the dentist in his practice.

PRINCIPLES OF MEDICINE

Dr. Robinson

In this course, taught throughout senior year, the objective is to enable the student to acquire a general knowledge of the various diseases of the heart, lungs, and abdominal organs. The essential principles of medicine are dwelt upon, with special attention to diseases which may result from mouth infections. The general principles of physical diagnosis are studied and demonstrated in the classroom and hospital, and eight lectures are devoted to first aid.

ORIENTATION AND PERSONAL HYGIENE

Dr. Speidel

Dr. Fisher

Orientation A course of eight lectures for freshmen, having for its objective to hold up before the beginning student the higher ideals of the profession, to assist him in adjusting himself to his professional studies, and to direct him in adopting sound methods of study.

Personal Hygiene A course of eight lectures for freshmen, the purpose of which is to guide the student in forming good habits of personal hygiene, so beneficial to his health and so important for his success in school and in practice.

DENTAL HISTORY AND ETHICS

Dr. Tiblier

This course, for seniors, treats of the intrinsic difference between moral good and moral evil; the rights of the dentist; his duties to himself; his relationship to his patient; his responsibilities to society and his obligations to his profession. Lectures cover the development of Dentistry and its advancement to its present health importance and professional standing.

JURISPRUDENCE

Mr. Bowab

These lectures, for seniors, cover the laws and regulations pertaining to the practice of dentistry, with all the legal relationships of dentist and patient, their rights and liabilities.

PRACTICE MANAGEMENT

Dr. Tiblier

A series of lectures, for seniors, on the starting and carrying on of a dental practice; locations; equipment; ethical publicity; collection; fees, insurance; general helpful hints, including office management; bookkeeping; assistants; and the psychological handling of the patient.

RELIGION

Fr. Bassich, S.J.

A special course is given in Evidences of Religion. It comprises a brief review of the field of Apologetics and the philosophy of Religion. Non-Catholic students are not required to attend these lectures.
